NATIONAL FOREST RESERVATION COMMISSION

LETTER

FROM THE

SECRETARY OF THE ARMY

TRANSMITTING

PURSUANT TO LAW, A REPORT OF THE NATIONAL
FOREST RESERVATION COMMISSION FOR
THE YEAR ENDED JUNE 30, 1951

JANUARY 10, 1952.—Referred to the Committee on Agriculture and Forestry
and ordered to be printed, with an illustration

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1952

ACT OF MARCH 1, 1911 (36 STAT. 961)

SEC. 4. That a Commission, to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and two members of the Senate, to be selected by the President of the Senate, and two members of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase as provided in section six of this act, and to fix the price or prices at which such lands may be purchased, and no purchases shall be made of any lands until such lands have been duly approved for purchase by said Commission: *Provided*, That the members of the Commission herein created shall serve as such only during their incumbency in their respective official positions, and any vacancy on the Commission shall be filled in the manner as the original appointment.

SEC. 5. That the Commission hereby appointed shall, through its president, annually report to Congress not later than the third day of January, the operations and expenditures of the Commission in detail during the preceding fiscal year.

**PERSONNEL OF THE NATIONAL FOREST RESERVATION COMMISSION
CREATED BY ACT OF MARCH 1, 1911**

Hon. Frank Pace, Jr., Secretary of the Army
Hon. Oscar L. Chapman, Secretary of the Interior
Hon. Charles F. Brannan, Secretary of Agriculture
Hon. Walter F. George, Senator from Georgia
Hon. Styles Bridges, Senator from New Hampshire
Hon. William M. Colmer, Member of Congress from Mississippi
Hon. Wesley A. D'Ewart, Member of Congress from Montana

F. W. Grover, Secretary, South Building
Department of Agriculture
Washington, D. C.

LETTER OF TRANSMITTAL

NATIONAL FOREST RESERVATION COMMISSION,
Washington, D. C., December 13, 1951.

The PRESIDENT OF THE SENATE.

SIR: In accordance with the provisions of section 5 of the act of Congress approved March 1, 1911 (36 Stat. 961), I have the honor to transmit herewith the report of the National Forest Reservation Commission for the fiscal year ended June 30, 1951.

Respectfully,

FRANK PACE, Jr.,
Secretary of the Army,
President, National Forest Reservation Commission.

20

National Forest Purchase Units Approved by the Commission Except as to Those Marked “*”, in Which Purchases Authorized by Special Acts of Congress

ANNUAL REPORT OF THE NATIONAL FOREST RESERVATION COMMISSION FOR THE FISCAL YEAR ENDED JUNE 30, 1951

During the year 181 recommended purchase cases involving 25,317 acres of land were approved by this Commission. Of these, eight tracts aggregating 2,934 acres were proposed pursuant to the several forest receipts acts and 43 tracts containing 5,313 acres were submitted in accordance with the act of June 22, 1948, which provides for the consolidation of the Superior National Forest wilderness area. The remaining 130 tracts, involving 17,070 acres, will be purchased under the Weeks law of March 1, 1911. Additionally, the Commission approved 91 proposals for the exchange of acquired national forest lands and timber for private, State, or county lands within the Weeks law national forests.

The approved transactions all involve lands within existing and approved purchase units the acquisition of which will promote more effective management of these units. The policy of the Commission that purchases be directed toward consolidation of national forest ownership within previously established unit boundaries was continued. The tables which follow set forth the fiscal year and cumulative land acquisition record in detail.

The national forests situated east of the Great Plains, which now include about 22,000,000 acres of national forest land, have been very largely, although not entirely, built up through acquisitions of forest and watershed lands under the Weeks law, as amended. These national forests represent an important investment by the Nation in soil, water, and forest conservation. They have great potentialities for repayment of this investment, both in terms of money and of public service. In fiscal year of 1951, for example, they produced over \$9,995,000 in receipts from sale of timber and other resources and from land uses. Additional dividends from prevention of soil erosion, betterment of watersheds, production of increasing supplies of timber for national needs, and opportunities for public recreation are not readily expressed in dollars but are certainly substantial and very important.

As illustrated by the next to last table in this report, however, funds available for land purchase under the Weeks law have fluctuated greatly over the years. Particularly during the period 1934-40 there was a large expansion in the purchase program which was necessarily followed by a sharp reduction and finally complete cessation during World War II. As a result, many of the established national forest units present dispersed patterns of public ownership, with much privately owned forest land still intermingled with the similar national forest tracts. In fact, more than one-half of the approved purchase units are less than 50 percent consolidated.

This dispersed or intermingled land-ownership pattern adds substantially to cost of management and protection of the public lands. Large amounts of administrative time that should be used to obtain

more intensive management and development of the resources are necessarily spent in surveying land lines, handling of trespasses or encroachments, obtaining of rights-of-way across the private land, and like activities. Benefits of public management and protection of the national forest lands are reduced or nullified if the intermingled lands are neglected, unwisely cultivated, clear-cut of their timber cover, or burned. In such circumstances, the potentialities of the national forest units to produce income and conserve soil and water are being only partly realized.

It is important, therefore, that national forests wherein a purchase program has been started be consolidated as soon as practicable. Especially, it is important to acquire promptly as possible tracts needed to eliminate fire hazards, complete timber sale areas, avoid expensive surveys, forestall trespass problems, and assure ingress to other public lands. Tracts which if not acquired will be unwisely used to the detriment or damage of adjacent national forest lands and tracts which present unusual opportunities for soil and timber conservation also have high priority. Experience since 1947 indicates that many such tracts are constantly available throughout the Weeks law purchase units. A purchase program which will permit acquisition each year of such key tracts is in the long run true economy, since through it loss of or damage to lands and important resource values can be minimized, administration of the national forest units simplified and facilitated, and the production of timber and other resources increased.
